ARRY KUSUMA PUTRA

6281350445065 | arrykusumaputra04@gmail.com | linkedin.com/in/arry-kusuma-putra | arryputra.vercel.app

I have experience in web and mobile application development, with the ability to work effectively on information system development projects. I am adaptable and quick to learn new technologies. I also have experience developing large-scale applications, including systems for government institutions and independent projects, with a focus on functionality, efficiency, and user needs.

PROJECT EXPERIENCE

URL Shortener & Smart Links Website — Tautku

https://tautku.com

- Built using Next.js, PostgreSQL, Prisma ORM, Better Auth, and Google OAuth.
- A URL shortening platform featuring custom short links, link management, and visit analytics.
- Designed a responsive user interface with a focus on user experience and UI/UX principles.
- Implemented a feature-based architecture and clean code principles to create a modular, organized, and maintainable codebase.

Digital Expense Tracker Application — Finote

https://play.google.com/store/apps/details?id=app.kodeari.finote

- Built using the Flutter framework and Dart programming language.
- A digital expense tracking application featuring transaction summaries with charts, multi-currency, multi-account, and multilingual support.
- Focused on application stability, user experience, and feature development based on user needs while minimizing bugs and system errors.

SPMB Data Entry Recapitulation Website — South Kalimantan Province

https://spmb.bpmpkalsel.web.id

- Built using the Laravel web framework and Tailwind CSS frontend framework.
- A data entry website for schools across South Kalimantan to collect new student enrollment data, integrated with spreadsheets to facilitate collaboration with the statistics team.
- Focused on intuitive user interface design for diverse users, optimal user experience, and a user reporting system.

Information Security Index Website

https://github.com/ArryPutra/indekskami

- Built using Next.js and PostgreSQL.
- An information security assessment and monitoring website for Regional Government Work Units (SKPD) in South Kalimantan.
- Focused on application performance, fast data access, security vulnerability prevention, and minimizing bugs and system errors.

INTERNSHIP EXPERIENCE

Department of Communication and Informatics of South Kalimantan Province

September 2024 – January 2025

- Developed the Information Security Index (KAMI) website to monitor and evaluate the level of information security within local government institutions in South Kalimantan.
- Worked as part of a team to analyze user requirements, design the system, and test the application.

BPMP South Kalimantan Province

December 2025 – June 2026

- Assisted with internal and external government operations in developing applications and websites to support organizational needs.

TRAINING EXPERIENCE

Bangkit Academy by Google, GoTo, dan Traveloka

February 2024 – June 2024

https://github.com/Teran-Capstone-Project

- Participated in the MSIB (Certified Independent Study and Internship) program under the Kampus Merdeka initiative.
- Specialized in Mobile Development, focusing on Kotlin and Android Studio.
- Studied application design techniques, English communication skills, and soft skills such as project management and teamwork.
- Collaboratively developed a final project involving Machine Learning and Cloud Computing technologies.

EDUCATION

Politeknik Negeri Banjarmasin

September 2022 – September 2025

Diploma in Information System – GPA: 3.90

- 1st Place, Website Coding Competition at Bank Kalsel, 2024.
- 1st Place, Software Development Competition organized by a university organization, 2022.
- 5th Place, International Business Administration Competition 2024 — Web Design category.
- Participant, GEMASTIK XV National Competition — User Experience Design category.
- Participated in Project-Based Learning (PBL) projects to develop websites for small and medium-sized enterprises (SMEs), serving as a programmer.
